

## Nightingales

Please listen out for Nightingales and report what you hear as accurately as you can on the table below. The best time to hear Nightingales is between 11pm and 2am.

Try to be as specific as you can about the bird's location to ensure that we don't count it twice. Ideally please mark the exact spot on the map you can download from the LAMBS website. Don't worry if you can't listen every day – any data at all is important.
